

Team App Live Scores Duty

Each week one family will be rostered on to upload “live scores” at half time and full time of the game.

To do this:

- Go into the App
- Click on Live Scores
- Select the team and type in the score

Once submitted everyone who has elected to receive notifications for this team will receive the score update.

If other families are not receiving they need to ensure they have turned on notifications.

To do this:

- Go into the App
- Click on Live Scores
- Select the team and slide the “notifications” button across (see below)

Note: If you are interested in another team’s results (for example the Premier League teams) you can turn notifications on for any team under the Live Score section.
